
One day away from school may not seem like much, especially when your child comes home most days and their usual response to your question: 'What did you do at school today?' is 'nothing' or 'I played.'

The enclosed Day in the Life aims to give you an insight into just how much learning takes place each day.

One missed day means one missed day of learning. One missed week can mean whole topics of learning are missed. Missed learning cannot always be caught up.

This leaflet has been produced in response to Parent Forum discussion.
