

# A MATHS MINDSET

Linking Growth Mindset and Maths

# CHANGING ATTITUDES

I THINK I CAN....

# HOW TO HELP AT HOME

- Share your practical maths problems
- Encourage children to see links in the numbers around them (odd and even doors, how many sweets can you buy if I give you 20p, etc.)
- Use mathematical language in every day contexts (fewer, most, least, half, whole, share equally, etc.)
- Have a positive attitude towards maths challenges

# NOW ON TO MONSTER MATHS...

Please find your child at their stall. We encourage you to also visit the activities provided for other year groups to understand the progression from Reception to Year 2. We would like the children to stay with their stall so they can explain their activity to other parents. (Reception...please return them)

Children to stay at their stalls and please leave them with teachers to collect at the end of the day.
