

Star Class Newsletter

Summer 1 2023

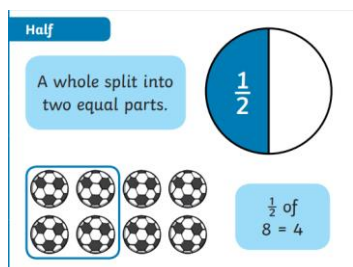

Spring has sprung! Star class has been really excited about the warmer weather and we used this as an opportunity to take a closer look at the seasons and how they change. Hopefully the weather will continue to improve as we head into the summer term. Don't forget to keep bringing in coats in case of wet weather as well as sun hats. As always, ensure names are on all personal items.

Maths

In Year 1 we have moved on from measurement to learn about applying counting in 2s, 5s and 10s to repeated addition. Practising counting in groups in practical contexts helps us to apply this understanding to calculations. Here is one of our mathematicians counting pairs of footprints.

In Year 2 we have been learning about fractions. This also helps us to revisit telling time to the nearest quarter of the hour.

Music

In Music, Stars are learning how to play the ocarina. We are practising with the goal of being able to perform our first song for the whole school in assembly.

Geography and Science

We are excited to be going to Catton Park this month as part of exploring the geography of our local community. We cannot wait to see the Catton Sculpture trail which was the inspiration for this term's reading challenge.

Please remember to wear PE kit on Wednesdays and Fridays. Please make sure to have named wellies, coats and water bottles in school for outdoor learning/playtimes every day.
