Geography Knowledge map

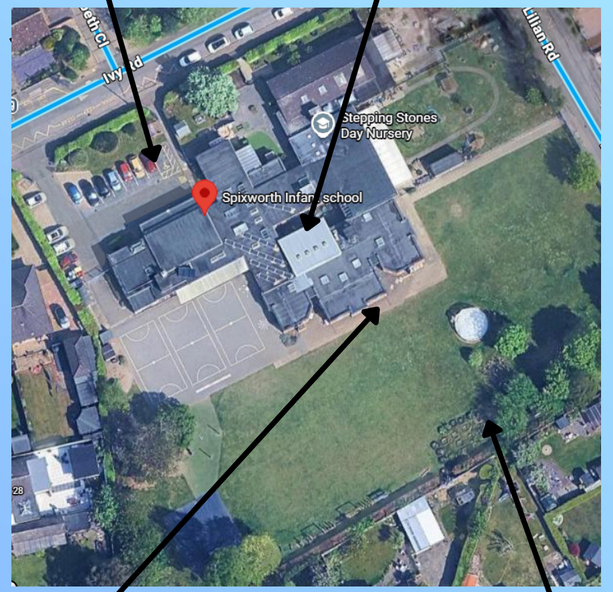

What do our school grounds look like on a map?

Vocabulary	
Far/ Near	"Far" means being a long distance away. For example, if a friend lives in another city, you might say they live far from you. "Near" means being close to something or someone in terms of distance.
Aerial view	An aerial view is like looking down at the world from high up in the sky, just like a bird flying or when you're in an airplane.
School grounds	School grounds are the areas around a school building where students can play, learn, and enjoy outdoor activities. This includes playgrounds, sports fields, gardens.
Human features	Human features are characteristics or parts of a place that are made by people. These include buildings, roads, bridges, and parks.
Physical features	Physical features are the natural parts of the Earth's surface, like mountains, rivers, and lakes. They are the things you can see in nature, such as hills, valleys, and oceans.
Left/ Right	*Left- This is the direction on your side when you face forward, and it's the opposite of right. If you're holding up both hands in front of you, the hand that makes an "L" shape is your left hand.

Map

Skills I need:

-Enquiry: Use a range of sources to recognise features of our school grounds

-Human & Physical: Know the make up of the school grounds, i.e buildings, field, playgrounds

-Location & Place: Identify characteristics of our local area using the vocabulary of near, far, left, right to describe features on a map
